Author Index Volumes 11–40

Abate, J., G.L. Choudhury and **W. Whitt,** Numerical inversion of multidimensional Laplace transforms by the Laguerre method 31 (1998) 229–243
Adams III, G.B. *see* **Kamin III, R.A.** 19 (1994) 259–276
Adas, A. and **A. Mukherjee,** Providing heterogeneous quality of service bounds for correlated video traffic at a multiplexor 38 (1999) 45–65
Ait-Hellal, O., E. Altman, A. Jean-Marie and **I.A. Kurkova,** On loss probabilities in presence of redundant packets and several traffic sources 36–37 (1999) 485–518
Ajmone Marsan, M., A. Bianco, T.V. Do, L. Jereb, R. Lo Cigno and **M. Munafò,** ATM simulation with CLASS 24 (1996) 137–159
Ajmone Marsan, M., *see* **Meo, M.** 27&28 (1996) 603–625
Ajmone Marsan, M., S. Donatelli and **F. Neri,** GSPN models of Markovian multiserver multiqueue systems 11 (1990) 227–240
Akar, N. and **E. Arikan,** Markov modulated periodic arrival process offered to an ATM multiplexer 22 (1995) 175–190
Akyamaç, A.A., J.A. Freebersyser and **J.K. Townsend,** Efficient simulation of QoS in ATM switches using connection traffic descriptors 38 (1999) 105–132
Akyildiz, I.F., Editorial (Traffic Contol in ATM Networks) 31 (1998) 1–2
Akyildiz, I.F. and **X. Cheng,** Analysis of a finite buffer queue with different scheduling and push-out schemes 19 (1994) 317–340
Akyildiz, I.F., J. Liebeherr and **I. Nikolaidis,** Multi-level rate-based flow control for ABR traffic 31 (1998) 107–131
Albuquerque, C., B.J. Vickers and **T. Suda,** Credit-based source-adaptive multilayered video multicast 40 (2000) 135–159
Alfa, A.S., *see* **Diamond, J.E.** 31 (1998) 201–210
Alfa, A.S., *see* **Yannopoulos, E.** 20 (1994) 373–390
Alkalai, L., *see* **Tai, A.T.** 35 (1999) 215–232
Alla, H. and **R. David,** A modelling and analysis tool for discrete events systems: continuous Petri net 33 (1998) 175–199
Altiok, T., *see* **Shiue, G.A.** 17 (1993) 225–232
Altman, E. and **Z. Liu,** On the stability of timed token rings 26 (1996) 219–234
Altman, E., *see* **Ait-Hellal, O.** 36–37 (1999) 485–518
Anantharam, V., M.L. Honig, U. Madhow and **V.K. Wei,** Optimization of a database hierarchy for mobility tracking in a personal communications network 20 (1994) 287–300
Anastasi, G., L. Lenzini and **B. Meini,** Performance evaluation of a worst case model of the MetaRing MAC protocol with global fairness 29 (1997) 127–151
Anciano-Martin, J.L., *see* **Savino-Vázquez, N.N.** 39 (2000) 207–233
Ansell, P.S., K.D. Glazebrook and **I. Mitrani,** Server allocation subject to variance constraints 27&28 (1996) 147–158
Arikan, E., *see* **Akar, N.** 22 (1995) 175–190
Arlitt, M., R. Friedrich and **T. Jin,** Performance evaluation of Web proxy cache replacement policies 39 (2000) 149–164

PII: S0166-5316(00)00018-3

Artiges, D. and **P. Nain,** Upper and lower bounds for the multiplexing of multiclass Markovian on/off sources 27&28 (1996) 673–698
Asrin, M.M. and **F. Kamoun,** A transient discrete-time queueing analysis of the ATM multiplexer 32 (1998) 153–183
Awater, G.A. and **H.A.B. van de Vlag,** Exact computation of time and call blocking probabilities in large, multi-traffic, multi-resource loss systems 25 (1996) 41–58
Bach, E., R. Mansharamani and **J. Strikwerda,** Estimating completion time ratios of a fork-join barrier synchronization 26 (1996) 145–154
Baiocchi, A., Accurate formulae for the loss probability evaluation in a large class of queueing systems 18 (1993) 125–132
Balbo, G., S. Donatelli, G. Franceschinis, A. Mazzeo, N. Mazzocca and **M. Ribaudo,** On the computation of performance characteristics of concurrent programs using GSPNs 19 (1994) 195–222
Balbo, G. and **G. Serazzi,** Asymptotic analysis of multiclass closed queueing networks: Common bottleneck 26 (1996) 51–72
Balbo, G. and **G. Serazzi,** Asymptotic analysis of multiclass closed queueing networks: Multiple bottlenecks 30 (1997) 115–152
Balbo, G., *see* **Sereno, M.** 29 (1997) 35–62
Balsamo, S., M.C. Clò and **L. Donatiello,** Cycle time distribution of cyclic networks with blocking 17 (1993) 159–168
Balsamo, S. and **V. de Nitto-Personé,** Closed queueing networks with finite capacities: blocking types, product-form solution and performance indices 12 (1991) 85–102
Banerji, A., *see* **Barchett, L.D.** 27&28 (1996) 507–518
Bannister, J., F. Borgonovo, L. Fratta and **M. Gerla,** A versatile model for predicting the performance of deflection-routing networks 16 (1992) 201–222
Barchett, L.D., A. Banerji, J.M. Tracey and **D.L. Cohn,** Problems using MD5 with IPv6 27&28 (1996) 507–518
Bause, F. and **P. Buchholz,** Queueing Petri nets with product form solution 32 (1998) 265–299
Baynat, B. and **Y. Dallery,** A unified view of product-form approximation techniques for general closed queueing networks 18 (1993) 205–224
Baynat, B. and **Y. Dallery,** A product-form approximation method for general closed queueing networks with several classes of customers 24 (1996) 165–188
Bellur, B.R. and **G.H. Sasaki,** A buffered statistical data fork 24 (1996) 205–229
Bennett, A.J., T. Field and **P. Harrison,** Modelling and validation of shared memory coherency protocols 27&28 (1996) 541–563
Berthold, M.R., *see* **Huber, K.-P.** 27&28 (1996) 473–490
Bianco, A., *see* **Ajmone Marsan, M.** 24 (1996) 137–159
Bianco, L., J. Błażewicz, P. Dell'Olmo and **M. Drozdowski,** Scheduling preemptive multiprocessor tasks on dedicated processors 20 (1994) 361–371
Billington, J. and **B. Henderson,** Guest Editorial (Analysis of Petri Net Performance Models) 18 (1993) 1–2
Bisdikian, C., W. Matragi and **K. Sohraby,** A framework for jitter analysis in cell based multiplexers 22 (1995) 257–277
Bisdikian, C., *see* **Mukherjee, B.** 16 (1992) 129–158
Bisdikian, C., *see* **Spiegel, E.M.** 19 (1994) 47–72
Bjorkman, N., A. Latour-Henner, A. Miah, S. Crosby, I. Leslie, M. Davey, R. Russell and **F. Toomey,** Exploring the queueing behaviour of ATM switches 27&28 (1996) 89–98
Blanc, J.P.C. and **L. Lenzini,** Analysis of communication systems with timed token protocols using the power-series algorithm 27&28 (1996) 391–409
Blanc, J.P.C. and **R.D. van de Mei,** Optimization of polling systems with Bernoulli schedules 22 (1995) 139–158
Błażewicz, J., *see* **Bianco, L.** 20 (1994) 361–371
Blieberger, J. and **U. Schmid,** Preemptive LCFS scheduling in hard real-time applications 15 (1992) 203–215
Blondia, C., Performance evaluation of an M/1-stage in an ATM switching element 15 (1992) 1–20

Blondia, C. and **O. Casals,** Statistical multiplexing of VBR sources: A matrix-analytic approach 16 (1992) 5–20
Blondia, C., *see* **Tran-Gia, P.** 21 (1994) 1–2

Mean queue length distribution, 30 (1997) 217
Mean time to failure, 27&28 (1996) 627; 34 (1998) 91
Mean value analysis, 11 (1990) 127, 143; 15 (1992) 41; 23 (1995) 31; 24 (1996) 303; 26 (1996) 133, 145; 29 (1997) 245; 32 (1998) 185; 33 (1998) 219; 39 (2000) 189
Mean value analysis algorithm, 29 (1997) 35; 36–37 (1999) 19
Mean waiting time, 11 (1990) 107; 13 (1991) 45; 15 (1992) 21; 20 (1994) 131; 25 (1996) 173
Mean workload minimization, 18 (1993) 103
Measurement infrastructure, 36–37 (1999) 233
Medium access control, 27&28 (1996) 391
Memory, 27&28 (1996) 253
Memory constraint, 11 (1990) 155
Memory hierarchy, 27&28 (1996) 175
Memory locality, 20 (1994) 27
Memory management models, 26 (1996) 239
Ménage problem, 17 (1993) 43
Merging transitions, 17 (1993) 91
Message delay, 12 (1991) 147
Message passing, 13 (1991) 207; 34 (1998) 1
Metamodeling, 27&28 (1996) 473
Methodology, 27&28 (1996) 19
Migration, 17 (1993) 53
Minimum rate, 38 (1999) 21
Mirrored disks, 20 (1994) 115
Mission reliability gain, 35 (1999) 215
Mixed (exhaustive, gated, and 1-limited) service strategy, 23 (1995) 107
Mixed service disciplines, 17 (1993) 189
Mixed workload scheduling, 36–37 (1999) 185
MMPP model, 34 (1998) 227
Mobile base stations, 36–37 (1999) 387
Mobile users, 36–37 (1999) 387
Mobility management, 36–37 (1999) 387
Mobility tracking, 20 (1994) 287
Model interaction, 22 (1995) 59
Model specification, 14 (1992) 157
Model-based evaluation, 14 (1992) 139; 24 (1996) 89

Modelling, 26 (1996) 51; 30 (1997) 115; 33 (1998) 175
Modelling and prediction, 11 (1990) 127
Modelling method, 16 (1992) 129
Modelling support environment, 22 (1995) 59
Modelling tool, 24 (1996) 47
Model with two queues, 11 (1990) 165
Moment analysis, 11 (1990) 127
Monitoring, 12 (1991) 191
Monotonicity, 12 (1991) 5; 13 (1991) 237
Monte Carlo integration, 29 (1997) 273
Moore graphs, 35 (1999) 49
MPEG video traffic, 30 (1997) 69; 32 (1998) 301
MPLS, 36–37 (1999) 267
MRGP, 35 (1999) 145
MRSPN, 20 (1994) 337
Multiaccess, 23 (1995) 53
Multiaccess protocol, 16 (1992) 223
Multicast, 34 (1998) 273; 35 (1999) 49
Multicasting, 33 (1998) 149
Multicasting flow control, 40 (2000) 161
Multicast protocols, 39 (2000) 61
Multiclass input, 27&28 (1996) 673
Multiclass queueing networks, 11 (1990) 127; 26 (1996) 51; 30 (1997) 115; 32 (1998) 101
Multiclass queueing theory, 11 (1990) 31
Multiclass queues, 27&28 (1996) 147
Multicomputers, 13 (1991) 159; 34 (1998) 1
Multilayer architectures, 11 (1990) 31
Multilayered video encoding, 40 (2000) 135
Multimedia, 35 (1999) 75
Multimedia communications, 22 (1995) 239
Multimedia servers, 33 (1998) 89
Multimedia storage servers, 36–37 (1999) 185
Multimedia-on-demand, 33 (1998) 201
Multidimensional Laplace transforms, 31 (1998) 229
Multi-dimensional generating functions, 36–37 (1999) 485
Multi-facility, 24 (1996) 303
Multi-layer protocol, 16 (1992) 85
Multiple classes, 25 (1996) 131
Multiple classes of requests, 17 (1993) 141
Multiple job classes, 17 (1993) 189
Multiple products, 17 (1993) 225
Multiple servers, 12 (1991) 255; 31 (1998) 163
Multiple vacation, 21 (1995) 239
Multiple-server queue, 29 (1997) 245
Multiplexing, 14 (1992) 103; 30 (1997) 45
Multiplexor, 21 (1994) 151; 27&28 (1996) 159; 38 (1999) 45
Multipoint-to-point multicasting, 40 (2000) 161
Multiprocesses, 11 (1990) 31
Multiprocessor, 12 (1991) 67; 23 (1995) 31; 27&28 (1996) 253, 519
Multiprocessor system, 15 (1992) 77; 17 (1993) 1
Multi-queue, 26 (1996) 201
Multiqueue model, 15 (1992) 65

Multiqueue systems, 11 (1990) 227
Multiqueueing system, 20 (1994) 391
Multiserver loss systems, 17 (1993) 141
Multiserver queue, 24 (1996) 189; 33 (1998) 249
Multi-server queues, 16 (1992) 49
Multi-stage multi-class queueing, 17 (1993) 225
Multi-tasking processing system, 11 (1990) 201
Multitasking systems, 13 (1991) 207
Multi-terminal system, 11 (1990) 1
Multiuser queues, 14 (1992) 79
Multiversion technique, 26 (1996) 21
Mutual consistency, 11 (1990) 9
MVA-algorithm, 11 (1990) 31
Nash equilibrium, 13 (1991) 181
Network, 11 (1990) 127
Network control and management, 30 (1997) 243
Network design, 36–37 (1999) 267
Network monitoring, 32 (1998) 217
Network protocols, 22 (1995) 221, 279
No waiting method, 34 (1998) 69
Non-blocking packet switch, 16 (1992) 241
Non-exhaustive service, 15 (1992) 1; 20 (1994) 391
Nonexhaustive service discipline, 25 (1996) 173
Nonlinear programming, 13 (1991) 17; 30 (1997) 217
Non-Markovian models, 35 (1999) 145
Nonpreemptive priority queue, 20 (1994) 131; 21 (1995) 215
Non-real-time, 11 (1990) 79
Nonuniform traffic, 12 (1991) 207; 25 (1996) 247
Normalization constant, 29 (1997) 273
Norton's theorem, 29 (1997) 245; 32 (1998) 83
Numerical analysis, 27&28 (1996) 117
Numerical Laplace transform inversion, 40 (2000) 47
Numerical methods, 27&28 (1996) 627
Numerical methods for transient analysis of Markov chains, 18 (1993) 79; 22 (1995) 3
Numerical procedures, 14 (1992) 79
Numerical solvers for Fredholm integral equations, 36–37 (1999) 35
Numerical solution of integro-differential equations, 20 (1994) 317
Numerical solution of Markov chains, 12 (1991) 237
Numerical solution of Volterra integral equations, 27&28 (1996) 565
Numerical solutions, 11 (1990) 45; 23 (1995) 241
Numerical techniques, 14 (1992) 197
Numerical transform inversion, 25 (1996) 267; 31 (1998) 229
Numerical transient analysis of continuous-time Markov chains, 27&28 (1996) 565
Occupancy distribution, 35 (1999) 1
On-board preventive maintenance, 35 (1999) 215
One-dimensional Markov chain, 14 (1992) 79
Online control, 12 (1991) 219
On-off sources, 32 (1998) 153; 38 (1999) 1
On-off-type multiple inputs, 23 (1995) 145
Open queuing networks, 11 (1990) 209
Open tandem network, 30 (1997) 3
Open tandem queue, 30 (1997) 217

Open-loop control, 11 (1990) 201

User behavior graph, 11 (1990) 155
Utilization, 17 (1993) 1
Vacation model, 12 (1991) 115; 15 (1992) 89; 20 (1994) 165; 29 (1997) 63, 195
Validation, 27&28 (1996) 541
Variable bit rate service, 31 (1998) 133
Variable bit rate source, 16 (1992) 5
Variable bit rate traffic, 12 (1991) 157
Variable resources, 34 (1998) 207
Variable-length messages, 32 (1998) 35
VBR traffic, 30 (1997) 45
Version management, 13 (1991) 131
Video coding, 16 (1992) 21
Video multicast, 40 (2000) 135
Video traffic, 38 (1999) 45
Virtual paths, 13 (1991) 27
Wait depth limited method 34 (1998) 69
Waiting and idle time distribution, 40 (2000) 3
Waiting time, 12 (1991) 115; 14 (1992) 65; 21 (1994) 163; 21 (1995) 239; 23 (1995) 261
Waiting time distribution, 11 (1990) 117; 13 (1991) 87; 27&28 (1996) 367; 35 (1999) 1
Waiting-time approximations 31 (1998) 163
WAN traffic management 34 (1998) 125
Warm spares 29 (1997) 195
Wavelength division multiplexing (WDM) 16 (1992) 223; 33 (1998) 113; 36–37 (1999) 333
Wavelength division multiplexing networks 25 (1996) 85
WDM 33 (1998) 149
Weak convergence, 17 (1993) 1
Weeks' algorithm 31 (1998) 229
Window flow control, 36–37 (1999) 307
Window protocols, 36–37 (1999) 289
Wireless communications, 36–37 (1999) 387
Wireless LANs and MAC protocol 27&28 (1996) 331
Wireless network, 20 (1994) 287; 27&28 (1996) 347
Workload, 21 (1994) 163
Workload allocation 25 (1996) 211
Workload characterization 11 (1990) 155; 20 (1994) 3; 33 (1998) 5, 27
Workload uncertainties 32 (1998) 185

Workload usage characteristics, 12 (1991) 269
Workstation workload modeling, 12 (1991) 269
Work/vacation model, 11 (1990) 79
World Wide Web 33 (1998) 5; 34 (1998) 249; 39 (2000) 149
Worst case traffic 30 (1997) 19
Wynn's ε-algorithm 31 (1998) 229
